Note 4

Note 1 Salary and other allowances

The increase in the salary code is from two components which are

1. salary and allowances of additional 7 staff: The purpose of increasing the number of staff is due to the difficulties faced by shortage of employees to complete the Annual Work Program.

2. Increase in the dependent allowance of the employees: The increase of MVR 10.1 million in dependent allowance compared to 2023 is the effort of the organization to increase the salary of the employees. A major change to salary has not been brought since 2008. The organization is also facing the issue of staff turnover in the past years. Therefore, it is crucial to take actions to retain the knowledge and experience within the organization. Therefore, the proposal is to increase the current dependent allowance by:

- AAG / Director - MVR 7,000
- Manager - MVR 6,000
- Senior Auditor / Officer - MVR 5,000
- Auditor / Officer - MVR 4,000
- Assistant Auditor / Officer - MVR 4,000
- Office Assistant - MVR 2,000

Note 2 Travelling Expenses

Overall travelling expenses have increased because , airfare and other costs related to travel have increased in the market.

Note 3 Office Administrative Expenses

With the change in Office space during 2023 there has been an increase in utility , Office maintenance and in building rent

Note 4 Computer Software

We have been using M365 since 2020, but we only have 36% E3 licenses from NCIT and rest is all E1 and other licensing. Currently we are using Office suit 2016 and it has limitation on managing large file for processing audits work.

Moving everyone to E3 license of M365 would provide several benefits to AGO. This would give us access to the latest version of the Microsoft Office 365, which includes advanced features and capabilities that can handle large files more efficiently. The E3 license would provide us with access to a range of collaboration software that can work on the Office apps locally, rather than using a browser. This would enable our teams to work more effectively together, regardless of their location or device, and improve communication and collaboration across the organization.

Hence, moving everyone to E3 license of M365 is part of our strategic initiative to move to cloud computing to improve productivity, enhanced collaboration capabilities, and access to additional tools and services.

Auditor General's Foreword

It is my pleasure to submit the Annual Work Plan of the Auditor General's Office for 2024. As part of our planning process, we have taken into account our legal mandate and the expectations of our key stakeholders with regards to our work in promoting government accountability and strengthening the management of public finances. We have also considered the delivery of public services by public institutions with due regard to the principles of economy, efficiency and effectiveness. The AGO plays a key role in providing an independent assurance over the financial management and financial reporting of public institutions that come within its purview such as government ministries, local councils, statutory bodies and other publicly funded institutions including, but not limited to public universities in the Maldives.

As the increase in public spending resulting from the government's desire to meet the growing demand for public services continues at a frenetic pace, the government is forced to increase its borrowing which in turn raises fiscal debt. Therefore, as has been the case in previous years, we will continue to prioritize audits focusing on public debt, whole-of-government financial statements, debt strategy and budget implementation in developing our financial audit work programme. However, in a departure from our current practice, we

propose to focus our financial statement audits only on key public institutions that are significant to the whole-of-government finances and carry out limited testing of transactions of entities that are deemed less complex. We have put up this proposal in view of dearth of resources and our past experience with regard to enhancing the audit impact by focusing our attention on the areas and issues that are most relevant and significant to our stakeholders.

As has been the case since the start of the current fiscal year, the AWP 2024 will seek to cover important areas by considering such factors as the level of risk, significance of issues in terms of their potential impact and the level of stakeholder interest. With invaluable input from our key stakeholders including members of public, our performance audit work programme has been developed to cover topics focusing such areas as the environmental protection, sustainable development, delivery of public services, and health and education schemes.

Hussain Niyazy
Auditor General of Maldives

Plan development process

The departments of the auditor general's office collect the relevant information required to develop their respective annual work plan.

01 INFORMATION GATHERING

The gathered information is assessed, and potential and required outputs are identified. Discussions regarding planned audit outputs are held at the department level, then at the division level, and finally at the executive level.

02 STRATEGIC AUDIT PLANNING DISCUSSION

Proposed audit topics that focus on aspects of economy, efficiency, effectiveness, and environment.

Proposed audit topics that focus on areas with major non-compliance and potentially fraudulent activities

Financial & Compliance audits of government entities and public institutions that are significant

03 PROPOSED AUDITS

Compilation of all planned audit outputs of AGO and required hours and budget to perform the planned outputs.

The annual work plan also identifies resource deficiencies within the organization.

04 ANNUAL WORK PLAN

Strategic Direction

AGO will look to achieve the following outcomes during the year 2024:

RELEVANCE

We will continue to ensure that our reports remain relevant and timely by focusing on key public institutions that are significant and by streamlining our audits to gear our work towards the expectations of our key stakeholders.

PUBLIC FINANCIAL MANAGEMENT

We will continue to ensure that our reports remain relevant and timely by focusing on key public institutions that are significant and by streamlining our audits to gear our work towards the expectations of our key stakeholders.

KEY STAKEHOLDER ENGAGEMENT

This AWR has developed to gain more insight into risks and key issues affecting the country and will seek to incorporate reasonable and valid stakeholder expectations through effective and continuous engagement with key stakeholders.

GREATER AUDIT IMPACT THROUGH AN EFFECTIVE FOLLOW-UP MECHANISM

We will look to assess the impact enabled by our work by following up on the implementation of our recommendations and measuring the impact of the implementation.

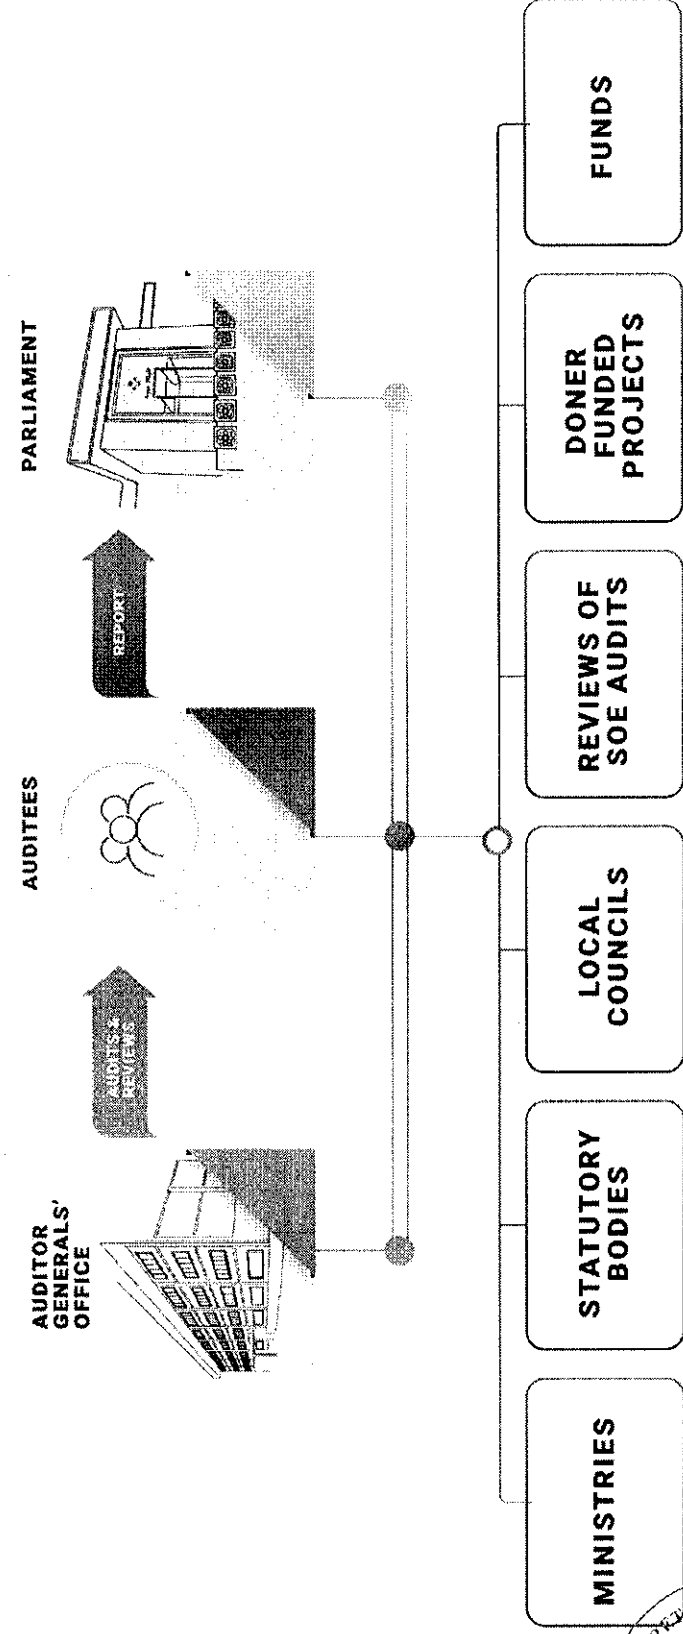

Our Role

What we do

The Auditor General reports to the People's Majlis and is responsible for the audits of public sector entities. These audits are published and help the parliament to hold the government and institutions accountable and keeps the public informed about the audits.

The Auditor General Conducts Financial and Compliance Audits, Performance Audits and Special Audits under the Audit Act 4/2007 and Public Finance Act 3/2006.

Our Audits

Financial and Compliance Audit

Financial and Compliance Audits provide an independent opinion on the Financial Statements of the State Consolidated Financial Statements, Ministries, Statutory Bodies, Local Councils, Donor funded projects. The Auditor General has a statutory requirement to conduct audits of the Accountable Government Agencies (AGAs) and these audits are a key part of effective public sector accountability and governance. It also helps to strengthen the financial management and reporting frameworks of the government.

Overall Audit Strategy

Delivering the audit of Consolidated Financial Statements on or before 30th June every year remains one of our key priorities for conducting financial statement audits. However, given our mandate to conduct audits of all Accountable Government Agencies under the Public Finance Act and the resource constraints, we will allocate resources to report on financial audits of all high risk and high priority AGAs by 31 May 2023. We will conduct compliance audits for the AGAs categorized as Medium and low risks. By implementing a risk based audit strategy, we aim to deliver the financial audits of AGAs which represent 85% of total state expenditure and 98% of state revenue.

Risk Based Approach

A risk based audit approach will be adopted to form the overall audit strategy of the FCAD. For each assignment the level of risks will be determined based on the materiality and significance, risk of material misstatement and the audit impact. This approach is adopted in order to utilize the available resources in the most efficient manner. The main indicators that were taken into account to determine the risk and priority level of the audit is listed below;

1. Materiality /significance of account areas
2. Risk of Material Misstatement
3. Risk of non-compliance
4. Audit Impact (media, public interest)

AGAs Audit Strategy

The scope and volume of audit procedures to be utilised will be determined based on the risk profile of the audit assignments. The overall risk profile will indicate whether the audit assignment is of high, medium or low risk. Although the level of testing on the audit profile is decided based on the risk ranked at the strategic level, the level of testing can be amended at the detail planning stage, if the preliminary examinations performed at the detail planning stage indicates a different risk rank of the audit profile. Unless otherwise the overall audit strategy for audit engagements shall be developed based on these factors.

- High Risk – Financial and Compliance Audit (audit procedures with detailed analytical review with comprehensive compliance testing for high risk areas)
- Medium Risk – Compliance Audit (analytical review to identify potential risky areas for detailed compliance testing)
- Low Risk – Compliance Audit (analytical review to detect possibilities of non-compliance)

State-Owned Enterprises Audit Strategy

Pursuant to Regulation on Audit and Accountability of State-owned Enterprises, the Auditor General will not be involved in the process of appointing external auditors of State-Owned Enterprises (SOEs). The regulation requires the SOEs to submit the audit report, management letter and the Report to the Auditor General on Internal Controls over Financial Reporting and on Compliance and Other Matters based on an Audit of Financial Statements to AGO which are then subject to post completion review by the Auditor General. Following the review of the Report, the Auditor General's Office will compile a report on the review of financial audit results and other matters identified in the report and communicate its findings to the President of Maldives, Parliament, relevant ministries, and public institutions and shall publish the report on Auditor General's Office's website.

Local Council Audit Strategy

Since the local councils have been empowered by the Decentralization Act, we aim to increase our presence in the audits of local councils more broadly by increasing the number of councils we audit in-house. We will be conducting financial statement audits for all City Councils, and Atoll Councils and island councils which operate businesses registered in Ministry of Economic Development. For the rest of the councils' compliance audits will be performed.

Since the year 2016 the strategy for Local Council Audits has been to contract out some of the audits. Our role in these audits is to review and issue the audit reports as AG's reports upon completion and submission of the audit reports and audit files to us. The reviews of local council audits are allocated among the audit departments. The target for delivery of these audits is on or before end of succeeding calendar year.

Audit of Funds

Every year we select material funds operated in the public accounting systems. Amongst them, we plan to conduct Financial and Compliance audits of the following funds.

1. Sovereign Development Fund
2. Maldives Green Fund
3. Zakat Fund

These audits will include review of financial transactions and governance of funds in relation to the fund statement regulation/Standard Operating Procedures for the fund.

Financial and compliance audits at a glance

Audits of Accountable Government Agencies

Other Financial and Compliance Audits, and Reviews

Performance audit

The Performance audit department carries out direct reporting engagements. The performance department focuses on aspects of the economy, efficiency, effectiveness, and environment.

The Annual Work Plan (AWP) for the year 2024 comprises the work to be performed by the Performance Audit Department for the year. The selection of audit topics and assignments to be included in the AWP is done as a part of overall strategic planning in the SAI.

The Annual Work Plan is used as a guide in order to monitor the progress of the work planned and keep in view the targets that are required to be realized during the year.

Audit topic selection process

In the absence of a formal strategic planning process, audit topics were derived from two main sources: general issues that we identified through scanning the audit environment and audit topics and suggestions from the within the performance audit departments and other audit departments of AGO.

The topic selection process involved the following steps:

- 1.Established a pool of potential audit topics.
- 2.Potential audit areas were prioritized by establishing the selection criteria.
- 3.Potential audit areas were prioritized after discussion with the senior management

The new topics chosen for 2024 were based on priority determined through rank and those required under International commitments.

Assessment of potential topics

A Scoring matrix was used to score each potential audit topic against a pre-set criteria and audit topics for the performance audit department and the special audit department were selected based on those scores. The criterion's weight was based on the importance of the criterion to the AGO's management, legislature, government, and the public. Auditors exercised professional judgement in the selection process and assigning the scores to the topics. This process was separately carried out for environmental audits.

The topic scoring the highest 'Aggregate Weighted Score' was ranked as the highest priority. Allocation of audit resources of the departments was based on the scoring matrix, with audits at the top of the list getting the highest number of resources. The number of audit topics included in the annual work plan depends on the net available resources of each department.

Assessment

Information regarding potential topics are collected and assessed, Topics are assessed base on:

Performance & Special audit

1. Legislative or public interest
2. Possible impact/potential added value
3. Relevance
4. Timeliness
5. Previous audit work
6. Materiality
7. Auditability

Performance Audit Specific:

1. Risk to the SAT
2. Request for performance audit
3. Other major work planned or in progress

Special Audit Specific:

1. Potential risks of areas

Annual Work Plan

Preparation of Annual Work Plan;

1. Identify priorities
2. Required Budget Hours
3. Resource requirements
4. Identify areas covered in AWP

Performance audit strategy

Performance audits are carried out with the objective to promote better value-for-money within public bodies by high- lighting and demonstrating to audited bodies ways in which they could make improvements to realize financial savings or reduce costs; provide a better quality of service; strengthen and enhance their management, administrative, and organiza- tional processes, and achieve their aims and objectives more cost-effectively. Performance audits are also conducted to study and examine value for money in the administration of various schemes and programs designed to improve the lives of citizens. Our main outputs are performance audit reports to audited entities.

Strategic direction of performance audits

New audits for 2024

1. Northern Fisheries Sector

The objective of this audit is to assess the reasons for the decline in fisheries sector in the North.

The downward trend in fisheries in North has been observed from almost two decades of data. Hence an audit on this topic is timely and also of significant priority at this time to identify the causes at the earliest possible.

Risks

Fish purchasing and processing factories - Field Investigations

Sh. Keekimini Lh. Felivaru

in operation of existing fish purchasing facilities in the region
Low cost of fish purchase, providing lower return to fishers
Inefficiencies of operation of fish processing facilities

Fishing communities - Field Investigations

Ha. Ihavandhoo Ha. Dhidhoo

Lh. Naifaru Lh. Hinnavaru

R. Ungoofaaru

R. Dhuvaafaru

R. Maduvvari

Community unaware of opportunities in fisheries sectors and
in effective awareness activities among youth on the
opportunities

Competing sectors of conservation (shark ban) and tourism
impacting fisheries

Lack of Government priority to sustain the fisheries sector

2. Use of fertilizers and pesticides in the Agricultural Sector

The objective of this audit is to assess the regulatory effectiveness of the use of fertilizers and pesticides in the agricultural industry.

Farmers are extensively using chemicals to improve nutrient status and quality of soil. Fertilizers and pesticides are the most common agrochemical applications used in Maldives and these products are foreign origin and are imported.

Irresponsible use of these chemicals has huge implications on our fragile environment and health. In 2021, a total of 1,393 tons of chemical fertilizers and 3,559 tons of pesticides were imported to Maldives.

Risks

Absence of relevant policies and legislation.
Poor enforcement of regulatory framework
Low awareness of farmers in utilizing the fertilizers and pesticides
Language barriers in use of chemicals (foreign language) and interpretation framework (foreign workers)
Inadequate monitoring of soil and water resources in farmlands
Absence of alternative less lethal chemicals for pesticides

Field Investigations - Island Leased for Agriculture

3. National Climate Change Adaptation Plan

The audit is a Global Cooperative Audit led by IDI in collaboration with WGEA. The objective of this audit is to improve accountability, effectiveness and inclusiveness of government's climate change adaptation actions.

4. Equal Futures Audit Initiative

The objective of equal futures audit initiative is to transform a group of SAI auditors into change agents who will develop change strategies for their SAs and lead a performance or compliance audit in themes related to gender, poverty, disability, ethnicity, age, or migration. Under the initiative, the AGO will be conducting audits on topics selected based on the areas identified in change strategies developed by the participants.

Special audit strategy

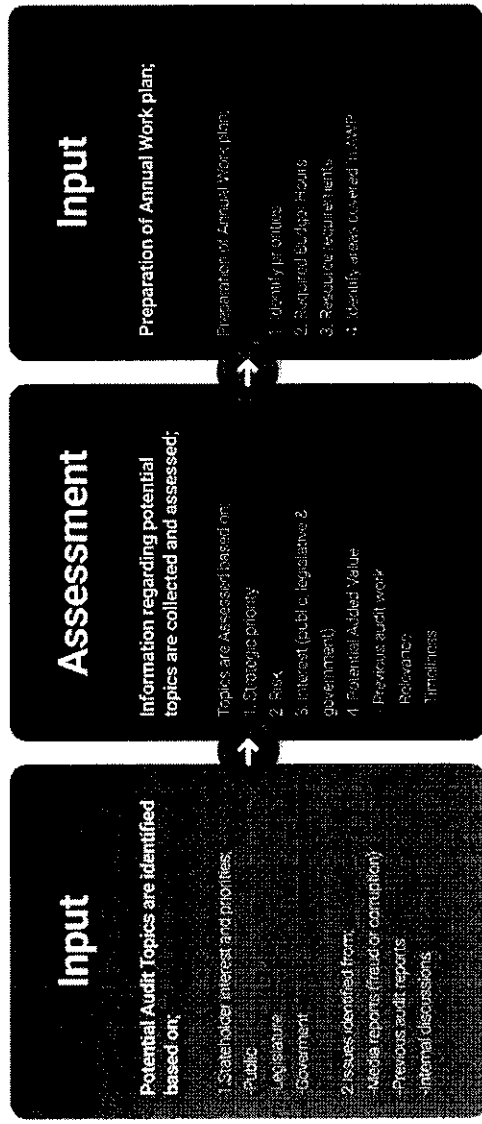

The special audit department was established to conduct more detailed examinations of issues of non-compliance, which are outside the scope of financial audits, and conduct detailed examinations of matters of serious allegations of fraud, mis- use, and wastage of public funds.

The key focus of special audits is to obtain sufficient evidence to ensure fraud, misuse, or wastage of public funds, has occurred and to submit the report to the parliament to make responsible parties accountable and, if required, to investigative authorities to take further action.

Audit topic selection process

During the preparations of the Annual Work Plan for the Special Audit Department, a range of potential audit topics emerged. These topics were primarily identified through internal discussions within the department and in consultation with the AGO (Auditor General's Office) management. Additionally, some potential audit subjects were sourced from media reports and findings from financial audits.

Following a thorough assessment of these topics based on our predefined criteria, we have chosen to incorporate five of them into the 2024 Annual Work Plan. In addition to these selected topics, the department has received the task to conduct audits for nine local councils within the

Overview of special audit program

Topic focus area
Maldives floating city project.

Brief overview
Identified /Potential Risks

- There is a risk associated with potential delays in the dredging activities conducted by Dutch Docklands Maldives Pvt Ltd.
- There is a concern that two leased lagoons may be sold at a price below their market value, posing a financial risk to the project.
- Multiple agreements between the Government of Maldives and Dutch Dockland Company have been signed with changing terms, indicating a contractual risk.
- Statements made by the Minister of Economic Development suggesting the unfeasibility of the project and potential fraud.
- It is suspected to be a racket involving the sale of lagoons at prices below market value.

The audit will examine the award of the project and the terms of the contract to assess their favorability to the Government of Maldives. It will also assess whether the resources provided by the Government of Maldives are being utilized in accordance with the agreed terms. Furthermore, it will also examine the progress of the project and assess whether the agreed schedules and milestones are being adhered to by the contractor.

Topic focus area
Fuel stock management of STO & FSM.

Brief overview
Identified /Potential Risks

- There is a significant concern regarding the alleged theft of inventory from the FSM fuel stock, indicated by a substantial MVR 15 million discrepancy between recorded balances and physical counts in 2023.
- There is a risk associated with insufficient controls in the management of fuel stock, which may have contributed to the inventory discrepancies.

- the sale of fuel by STO to parties other than FSM at rates lower than those offered to its subsidiary raises questions about pricing and potential conflicts of interest.

Audit Examine the adequacy of controls in fuel stock management for both FSM and STO to identify any weaknesses that may have contributed to the inventory discrepancies. It will also investigate the inventory discrepancies to determine whether they are indicative of inventory theft. Evaluate the policies and practices governing fuel sales by STO, particularly the rates offered to non-FSM parties, to assess compliance and potential conflicts of interest.

Topic focus area	Brief overview
SME Development Corporation.	Finance Identified /Potential Risks

- the company has provided financing to SMEs amounting to MVR 1.34 billion by July 2023, with a focus on the tourism sector, which might indicate focus on a already well established sector and it also poses financial exposure risk in case of unseen impact on the sector (e.g. COVID-19)
- there are reports of loans being extended to politically affiliated parties who are not making regular repayments, indicating a credit risk.
- Loans are reportedly offered to parties that are unable to repay them, suggesting a risk associated with lending to unqualified borrowers.

The audit will Examine whether the loans offered to small and medium-sized businesses align with approved policies and strategies and are extended to eligible borrowers. It will assess the company's compliance with the rules and regulations set forth by the Maldives Monetary Authority (MMA) for financial institutions. furthermore, it will examine the repayment behavior of borrowers and analyze the actions taken by in cases of overdue payments or defaults on loans.

Topic focus area

Procurement of Regional Airports.

Brief overview

Identified /Potential Risks

- There is a risk associated with the termination of five contracts for airport development projects due to contractors' inability to obtain finance.
- Delays in awarded airport development projects due to difficulties in arranging loans by contractors pose a risk to project timelines and costs.
- The company is operating at a loss of MVR 75 million, indicating a financial risk.
- Allegations of fraud during the company's time as a department in government ministries, particularly related to the procurement of buses and fire trucks.
- Procurement controlled primarily by the headquarters, with minimal involvement of individual airports, may lead to the acquisition of unnecessary items, potentially causing financial inefficiencies.
- Allegations of stock misuse by regional airports before their incorporation as a company raise concerns about inventory management.

The audit will examine the procurement practices of the company, with a focus on assessing and compliance with regulations and company policies. Further the audit will Evaluate the project management practices of the company, specifically looking into the causes of contract terminations and delays in airport development projects. it will also assess the company's practices in managing its stock and inventory control procedures.

Annual Work Plan 2024

Topic focus area

Procurement and project implementation of Maldives state shipping.

Brief overview

Identified /Potential Risks

- The shipping segment within the STO group incurred a significant capital expenditure of MVR 126 million in 2022, potentially driven by non-competitive procurement practices or initial startup costs.
 - Approval to purchase a container vessel (2021)
 - Approval to purchase a bulk carrier (2021)
- The company is currently operating at a loss (MVR 20 million P(L)BT)
- There are concerns regarding potential fraudulent and corrupt activities in the procurement process, including the awarding of work to unqualified parties, posing governance and integrity risks.
- Delays in project implementation due to mismanagement or lack of planning may lead to cost overruns and operational inefficiencies.

The audit will examine the procurement practices of the company to determine whether they adhere to transparency, fairness, and competitiveness. It will furthermore assess the implementation of key projects and works within the company, investigating potential causes of delays and mismanagement. And conduct a review of overall company operations to identify areas of improvement and efficiency.

Information Systems Audit

The Information Systems Audit (IS) is mandated with the audit of information systems of public sector entities and state-owned enterprises. The public sector accounting is maintained using SAP and almost all SOs use accounting software to maintain the accounting records and for financial reporting. Other related functions such as payroll, procurement, revenue, public debt and assets are also maintained on various computer platforms and the independent assessment in the form of IS audits on the integrity, system controls, reliability and accuracy of the information and data are paramount to place reasonable assurance on the financial reporting system.

Information Systems Audits planned to be conducted in 2024 are as follows:

1. General IT controls and specific control reviews – Viya Module
2. General IT controls and specific control reviews – Political Party Information Management System
3. General IT controls and specific control reviews – NSPA
4. Information security of Efaas.
